Man of Steel vs The Dark KnightIn preparation for the upcoming Batman V Superman film, I've decided to revisit a few of each of the heroes' feature films, especially those where they come in direct conflict with one another.The Batman Superman Movie: World's Finest is yet another example of a film that gets the relationship of the two most iconic superheroes, right. The Superman animated series took 3 episodes and made it into a mini TV movie, and for the most part, it plays out very much like both Batman and Superman's shows. The voice talent of Mark Hamill and Kevin Conroy reprised their iconic voice performances as Joker and Batman respectively and head over to Metropolis for a few episodes.The plot is essentially the same plot that Lego Batman 2 followed years later, but it's always fun to watch the dynamics of these world famous characters done justice. Joker finds kryptonite and decides to strike a deal with Lex Luthor, voiced by the incredible Clancy Brown, in exchange for money. So sure, the plot is pretty basic, but it served a purpose in getting the caped crusader in Gotham in the first place.Bruce Wayne shares a relationship with Lois Lane which gave another reason for the two heroes to be on opposing ends of the stick. The dynamic was a little strange at first, but it grew on me a bit as it's really just a typical thing Bruce Wayne would do in that situation. The film's tone overall is very consistent with the animated series of the respected characters. So campy at times, and serious at other times. But if you're a fan of the animated series' than you would definitely be a fan of this mini movie.The voice talent is incredible overall and the animation is exactly what it should be in a film like this. It's predictable in every sense of the word, but the dynamic between the characters we know and love is why you watch a film like this. It's exactly what I would hope the Batman V Superman film will be like.+Voice talent+Dynamics are handled right-Nothing really new here6.1/10Suggests an edit or add missing contently what name was Batman & Terasmus: Assápari ja Jokeri (1997) officially released in Canada in English?Answer 2009 film directed by Sam Liu Superman/Batman: Public EnemiesDVD coverDirected bySam LiuWritten byStan BerkowitzBased onSuperman/Batmanby Jeph Loeb and Ed McGuinnessProduced byBruce TimmAlan BurnettMichael GoguenBobbie PageSam RegisterBenjamin MelnikerMichael UslanStarringKevin ConroyTim DalyClancy BrownXander BerkeleyCorey BurtonRicardo ChaviraAllison MackJohn C. Directed by Sam Liu and released by Warner Bros. Animation on September 29, 2009.[2] It is the sixth film of the DC Universe Animated Original Movies. The film received generally positive reviews upon release. Plot Lex Luthor has been elected President of the United States during a severe nationwide economic depression. Under his leadership, the economy begins to thrive, and he assembles a force of government-employed superheroes consisting of Captain Atom, Katana, Black Lightning, Power Girl, Starfire, and Major Force. Despite Power Girl's enthusiasm about the peace and stability and Captain Atom's loyalty to the government, Superman and Batman maintain their distrust toward Luthor. The United States government discovers a massive Kryptonite meteor hurtling toward Earth. Instead of asking superheroes for aid, Luthor decides to destroy it with nuclear missiles. Luthor arranges a meeting with Superman in Gotham City under the pretense of a truce, only to result in a battle with the hired Metallo against Superman and Batman, in which Metallo manages to injure them both before an unknown assailant kills Metallo. On national television, Luthor pins Metallo's murder on Superman, using altered footage of their battle to implicate him as well as a baseless claim that Kryptonite radiation can affect Superman's judgment, then places a billion-dollar bounty on Superman. Batman and Superman break into S.T.A.R. Labs seeking information on the meteor and finding Metallo's remains; they realize that a radioactive energy blast is what killed him, and it was made to look like Superman's heat vision. An army of villains looking to collect the bounty attacks them. Superman and Batman easily overpower most of the villains while Captain Atom defeats the rest with a giant energy blast. All of Luthor's superhero team except Power Girl, whose loyalties are divided, attempt to capture the heroic duo until Superman creates a twister using his super-speed, and the two heroes escape with Power Girl. In Metropolis, Power Girl admits that she does not believe Superman killed Metallo. Luthor's superheroes catch up and the fight begins anew with Power Girl aiding Batman and Superman until Batman realizes that Major Force killed Metallo under Luthor's orders and goads him into admitting it in front of everyone. When Major Force snaps and tries to murder him, Power Girl punches him in the stomach hard enough to rupture his containment suit, releasing his radiation. Captain Atom manages to absorb the energy, disintegrating Major Force and leaving him comatose. Meanwhile, the missiles fail due to the sheer amount of radiation the meteor gives off detonating them before impact. Amanda Waller discovers that Luthor has secretly been taking a serum composed of strength-enhancing steroids and liquid Kryptonite, but is slowly driving him insane with continued use. Luthor then informs Waller that he will let the meteor hit the Earth and he plans to rebuild society in his image, making himself Earth's single leader. Batman and Superman battle Captain Marvel and Hawkman before breaking into Luthor's base of operations to retrieve data on the meteor. Luthor refuses to relinquish the data, going so far as to erase it from the lab computers, but Waller gives them a copy. Batman, Superman, and Power Girl fly off to Tokyo to deliver the data to the Japanese Toyman, who has already built a giant rocket-propelled spacecraft, intending to use it as a large missile to stop the meteor. Waller and the military then attempt to arrest Luthor with the discovery of his world-domination scheme, but he injects himself with more Kryptonite steroids and dons a power suit equipped with Kryptonite weaponry. After escaping Waller and the military, Luthor follows Superman and Batman overseas, intending to kill Superman himself. After Batman and Superman arrive at Toyman's lab, he shows them the spacecraft, which resembles a giant, robotic composite version of Superman and Batman. With the data, Toyman is able to calculate the necessary reinforcements needed for the rocket so it will not explode before impact. Unfortunately, Luthor arrives and neutralizes Power Girl, Superman, and Batman, then disables the rocket's remote guidance systems so that it will not take off by itself. With no other choice left, Batman decides to fly the rocket himself even in spite of Superman's protests. Though initially faring poorly against Luthor and his power suit, Superman eventually gains the upper hand when they reach Metropolis, and disables his power suit. Luthor's team arrives with a recovered Captain Atom, who apprehends Luthor. Batman succeeds in destroying the meteor, and Superman finds him alive in an escape pod resembling the symbols of both heroes. With the truth of Metallo's death now public knowledge, Superman is cleared of the murder charge, while Luthor is arrested and taken away to face trial and impeachment for his crimes. Batman returns to Gotham while the Daily Planet's star journalist, Lois Lane, arrives and happily embraces the Man of Steel. At the DVD sales chart, Superman/Batman: Public Enemies opened at #5, selling 197,626 in the first week for revenue of \$3,222,460. As of today, 527,482 units have been sold translating to \$7,911,279 in revenue (This does not include rentals/Blu-ray sales). This makes Public Enemies the second highest selling DVD only behind Superman: Doomsday and the third most profitable of the ten movies in the DC Universe Animated Original Movies line-up.[7] The film has currently[when?] earned a total of \$11,037,595 from domestic home video sales.[7] Home media Superman/Batman: Public Enemies was released on standard DVD in single and double disc editions, along with a high definition Blu-ray release, on September 29, 2009. Special features for the double disc edition include an inside look of Wonder Woman, Batman: Gotham Knight, Justice League: The New Frontier, and Green Lantern: First Flight, DC Comics' 2009 crossover event Blackest Night, two production featurettes, a sneak peek of Justice League: Crisis on Two Earths, trailers of Green Lantern: First Flight, Fringe, and Batman: Arkham Asylum, digital copy download, and two episodes of Superman: The Animated Series picked by Bruce Timm. The Blu-ray edition has all the features of the double disc standard definition release including three additional Justice League episodes selected by Timm. The good performance of the Superman/Batman: Public Enemies release has led Warner Premiere and DC Universe to release a sequel, Superman/Batman: Apocalypse, based on the Superman/Batman comic storyline "The Supergirl from Krypton".
